

TID/TSB-018-63  
7 March 1963

MEMORANDUM FOR: Chief, Technical Intelligence Division

SUBJECT: Camera Malfunction on Missions 3466 and 3469

1. It has been noted that "B" camera number 9 has been used on Mission 3466 (4 March 1963) and Mission 3469 (5 March 1963), and that on both missions the same camera malfunction occurred. This malfunction resulted in the exposure of two consecutive frames in position 2L. Consequently, there is no exposure for position 3L. It is evident that the camera failed to shift from position 2L to position 3L, but remained and exposed in position 2L, when it should have moved to the position 3L.

2. It is recommended that the units operating these cameras be notified of this problem so that corrective action can be taken before camera serial number 9 is used on another mission.
